## OVERVIEW

**The 4th Global Ophthalmology Summit** brings together global ophthalmology leaders to learn from one another, share clinical and research expertise, and explore opportunities to collaborate. The Summit was created to improve eye health and stop blindness through educational and technological innovation, public health advocacy, direct service, eye research, and through building strong global ophthalmology collaboration. The target audience is practicing ophthalmologists, fellows, residents, medical students, nonprofit and industry representatives. 400+ are expected to attend.

## PROGRAM HIGHLIGHTS

- Access to global ophthalmology leaders through interactive sessions
- Intimate networking events tailored to regional areas of interest and fields of work in global ophthalmology
- Cutting-edge surgical simulation technology
- Dedicated resident and fellow programming
- Healthy competition in a Global Hackathon that will allow attendees to crowdsource innovations to come up with winning solutions to address inequities in eye health

## ORGANIZERS

### 2025 Executive Committee

- American Academy of Ophthalmology
- University of Illinois Chicago, Illinois Eye and Ear

### Consortium Members

- Cornell University, Weill Cornell Medicine
- Emory University, Emory Eye Center
- Francis I. Proctor Foundation, University of California San Francisco, Department of Ophthalmology
- Mayo Clinic, Department of Ophthalmology
- Oregon Health and Science University, Casey Eye Institute
- Thomas Jefferson University, Wills Eye Hospital
- University of Arizona, College of Medicine-Phoenix
- University of Iowa Health Care
- University of Michigan, Kellogg Eye Center
- University of Nebraska Medical Center, Stanley M. Truhlsen Eye Institute
- University of Rochester Medical Center, Flaum Eye Institute
- University of Utah, John A. Moran Eye Center
- University of Wisconsin, Department of Ophthalmology and Visual Sciences
- Yale University, Department of Ophthalmology and Visual Science

## EDUCATIONAL OBJECTIVES

- Describe the current state of vision impairment and its causes in the world
- Develop strategies for meeting the WHO's 2030 targets
- Describe the role of social determinants of health in vision impairment and health inequities
- Describe the importance of innovation and technology in meeting the challenges of blindness prevention
- Discuss the importance of equitable partnerships across geographic boundaries, as well as interprofessional entities
- Develop a working knowledge of the tools (knowledge, equipment, funding) necessary to carry out impactful work
- Have improved understanding of phacoemulsification surgery in low-resource settings.
- Understand the global industry supply chain and human resources to connect local ophthalmologists with industry partners
- Understand avenues for industry collaboration in global ophthalmology, including training opportunities for international ophthalmologists.
- Understand how to partner with government entities, non-profits, and industry in impactful ways
